MILSET

The International Movement for Leisure Activities in Science and Technology (MILSET – Mouvement International pour le Loisir Scientifique et Technique) is a non-governmental, non-profit, and politically independent youth organisation, founded in 1987 in Quebec, Canada, which aims at developing scientific culture among young people through the organisation of science and technology programmes, including science fairs, science camps, congresses, and other high-quality activities.

Thanks to MILSET, tens of thousands of young people have already met to exchange and make the most of their creations, discuss with researchers, youth leaders and industrialists. They have developed projects together, discovered foreign languages and cultures, and have been trained to acquire new technologies.
